GLOW PLUG CAP & LEAD for Onboard & Remote Systems

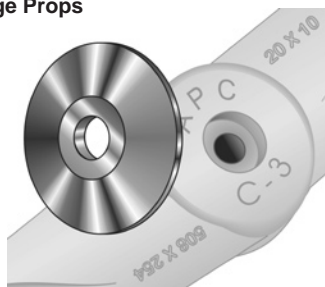

Recommended for 2-stroke engines - and 4-strokes where the plug is not recessed.

CHMGPC \$4.50

PROP WASHER for Large Props

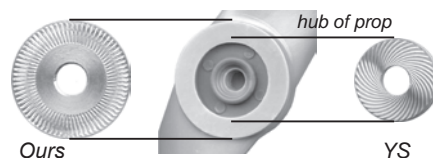

FITS LARGE PROPS

The standard prop washer supplied with YS engines will often be too small to fit the larger props used in 3-D flying. Central Hobbies offers the perfect replacement prop washer, made to fit and secure larger props. This prop washer can be used effectively with the thrust washer shown above. Made of strong and lightweight aircraft-grade aluminum.

#CHMPWFLP Sale Price \$7.95

TRUE "GRIPPER" THRUST WASHER

GET MORE BITE WHERE IT REALLY COUNTS

See above why the thrust washers supplied with engines don't work well with the larger props used by 3D fliers. Notice how the stock washer barely gets beyond the empty space of the cavity in the prop. Central Hobbies solved this problem by manufacturing a thrust washer that covers the actual gripping area of the big props.

D.E.P.S. THE DUAL ELEVATOR PUSHROD CONTROL SYSTEM

DEPENDABLE CONTROL WITH THE D.E.P.S. SYSTEM

Light and strong, the D.E.P.S. control method provides the reliable and precise elevator control needed for specialized aerobatic maneuvers, such as in pattern and 3D flight. D.E.P.S. eliminates excess play between elevator halves and other problems often associated with less effective methods. If you want precision, you need D.E.P.S. See complete instructions on our website.
