VORTECH ADAPTER NUTS

Vortech steel prop adapter nuts include prop washers and are also CNC machined to offer the best possible quality. They are available in different crankshaft threads to fit many engines on the market.

To avoid problem with longer screws, which may flex and break, Vortech adapter nuts are offered in 4 sizes: **Short, Long, X-Long** and **XX- Long**.

According to the spinner size and the thickness of your prop, it's a good rule to use the longest adapter nut possible. A longer adapter enables you to use a shorter screw which is less likely to flex or break.

When using Vortech Adapters:

Use **SHORT** adapters on spinners 2 1/2" & under.
 Use **LONG** adapters with 2 3/4" to 3" spinners.
 Use **X-LONG** adapters with 3 1/4" to 4" spinners.
 Use **XX-LONG** adapters with spinners 4 1/2" & up.

On 4-Stroke Engines: Use a **LOCK NUT** with the adapter nut.

SIX-SHOOTER

Fuel Pump

A hand operated rotary fuel pump designed specifically for model use. Featuring a tough, fuel resistant surface that resists

splitting — no seals or valves to leak or wear out. The unit is self priming and will stop and reverse almost instantly. Industrial quality and measured output make the Six-Shooter a popular favorite for users everywhere.

DAV2001 for GLO FUEL\$14.95

DAV2002 for GAS\$15.95

THE HOLSTER

The Holster is a must-have accessory for the Six-Shooter. This legendary pair can be strapped right onto your plastic gallon bottle of fuel.

The Six-Shooter's strap securely holds the bottle, and the Holster supports both the bottle and pump.
